Manchester, UK | Boardmanjoseph257@gmail.com | 07472866063

Education

BSc Computer Science-First Year Average (68.1%) UNIVERSITY OF NOTTINGHAM	SEPTEMBER 2024 - PRESENT
A LEVELS – PHYSICS (A), BIOLOGY (A), MATH (A). CO-OP CONNEL COLLEGE	SEPTEMBER 2022 – 2024
GCSE – MATHS (8), ENGLISH (6) Co-op ACADEMY MANCHESTER	FEBURARY 2021 – 2022

Experience

ASSISTANT SUPERVISOR

MORRISONS DAILY SUPERMARKET, MANCHESTER

APRIL 2024 — PRESENT

- Led daily operations and supported team coordination across departments, ensuring smooth workflow and customer satisfaction.
- Trained and mentored new staff, fostering a collaborative and efficient work environment.
- Applied analytical thinking to optimize shift planning and resource allocation, improving team productivity.

TEAM MEMBER

POPEYES LOUISIANA KITCHEN, MANCHESTER

OCTOBER 2023 — JUNE 2024

- Delivered high-quality customer service in a fast-paced environment, handling orders, resolving issues, and maintaining brand standards.
- Coordinated shift operations and supported team members to ensure smooth service and timely food preparation.

Projects

Software Developer

GUI Calculator Application Independent Project - Java Swing | 2024

- Designed and implemented a desktop calculator using Java Swing, applying event-driven programming principles to support basic arithmetic operations.
- Demonstrated proficiency in object-oriented design, layout management, and responsive user interface development.

Backend Developer

Data Management System - Independent Project | Java & C++ | 2024

- Developed a custom software solution to manage post-booking data for Airbnb reservations, streamlining guest information handling and retrieval.
- Engineered backend logic for data categorization, integrity validation, and scalable integration with property management workflows.

Independent Project - HTML, JavaScript, Supabase, Git | 2024

- Designed a responsive web interface using HTML and JavaScript to enable real-time search and retrieval of structured driver license records.
- Integrated Supabase as the backend database solution, implementing secure query logic and API calls to manage user input and data access.
- Applied Git-based version control to manage iterative development, feature branching, and collaborative updates.

Reversi Game

First-Year University Project - Java | Object-Oriented Programming, GUI Design | 2024

- Developed a fully functioning Reversi game in Java as part of my first-year programming module.
- Designed an interactive GUI using Java Swing, enabling intuitive gameplay and real-time score updates.
- Applied object-oriented principles to structure game components (Board, Player, Game Controller) for clarity and modularity

Skills and Interests.

Technical: JavaScript, C++, HTML, Java, CSS, GUI programming, Assembly.

Frameworks & Tools: Git, JUnit, VsCode, SQL, Jupyter Notebook, Eclipse, IntelliJ.

Languages: Yoruba (Native), English (Fluent).

Interest: Video Games, sport (Football), and chess.
